CYLA Tokenomics

- Token: CYLA — Community Token
- Network: Solana (SPL)
- Total Supply: 1,000,000,000 (1B) — Fixed
- Contact: admin@cyls.exchange

Why CYLA?

CYLA is the exclusive Community Access Token for the CYLS ecosystem. It is the key to the front door, granting committed community members access to growth opportunities and the ability to participate in community-driven rewards.

Important Notice: This document is for informational purposes only and does not constitute an offer to sell, or a solicitation of an offer to buy, any tokens or securities. Any offering of CYLT tokens will be made only pursuant to definitive offering documents.

1. What Is CYLA?

- CYLA is the community and access token for the CYLS ecosystem
- Holding CYLA makes you eligible to receive CYLR rewards proportionally to your holdings

CYLA does not represent a claim on revenues, profits, or assets

- It is one of three tokens in the CYLS system: CYLA (access), CYLR (rewards), CYLT (security)

See CYLS Project Whitepaper for full system overview and definitions.

2. Design Principles

- **Cheap & fast:** Built as a standard Solana SPL token, enabling low-cost, high-speed transactions with **no protocol fees on wallet-to-wallet transfers**
- **Listing-friendly:** Launched as a plain SPL token with **no embedded transfer taxes, hooks, or non-standard mechanics**, making it compatible with DEXs, wallets, and exchanges
- **No token-level restrictions:** CYLA has **no embedded fees, taxes, or transfer restrictions** at the token contract level. Any ecosystem utilities (e.g., eligibility logic, caps, or incentives) are implemented **off-token at the program or application layer**
- **Transparent parameters:** Key system parameters are published on-chain in a **public registry** and can only be modified through **multisig governance with a timelock**
- **Clear role separation:** CYLA functions exclusively as the **community and access token**, while CYLR handles rewards and CYLT represents regulated, yield-bearing exposure

3. Token Specifications

- Network: Solana (SPL standard, Token program)
- Decimals: 6 (matches other CYLS tokens and Solana tooling)
- Total supply: 1,000,000,000 CYLA (1B) — fixed, all minted at genesis
- Mint authority: Renounced before or at Token Generation event (TGE)— supply can never increase

Supply Guarantee: All 1,000,000,000 CYLA are minted at genesis. The mint authority is renounced before Token Generation event (TGE), making the supply permanently fixed. No entity can ever mint additional CYLA tokens.

- Freeze authority: Renounced before or at Token Generation event (TGE)
- Transfer tax: None — plain SPL token with no hidden logic

4. Supply & Allocation

- Total supply: 1,000,000,000 CYLA (1B) — fixed at genesis
- Target circulating at TGE: ~5% of supply (50M CYLA)

Allocation Breakdown

Allocation Breakdown:

- **5% — Initial Supply (50M CYLA):** Circulating at the Token Generation Event (TGE) to support initial liquidity and early community participation

- **70% — Treasury Reserve (700M CYLA):** Held by the Treasury for strategic sales
 - Treasury sales generate **SOL proceeds**, which are valued on a **net USD-equivalent basis**
 - **CYLR is minted 1:1 with the net USD-equivalent value realized** and distributed to eligible CYLA holders
- **5% — Team (50M CYLA):** Subject to vesting over **36 months** with a **6-month cliff**
- **10% — Marketing (100M CYLA):** Allocated for partnerships, campaigns, and ecosystem growth initiatives
- **10% — Sponsor (100M CYLA):** Reserved for sponsor allocations pursuant to applicable legal agreements

CYLA TOKEN ALLOCATION

1B Fixed Supply

█ **70% Treasury Reserve**
(strategic sales → CYLR rewards)

█ **5% Team**
(36-month vest, 6-month cliff)

█ **10% Marketing**
(partnerships, campaigns, growth)

█ **5% Initial Supply**
(circulating at TGE)

█ **10% Sponsor**
(per legal agreements)

Mint authority renounced at TGE - supply fixed
forever

Excluded Wallets

The following wallet categories do NOT receive CYLR rewards:

- Treasury wallet

- Sponsor wallet
- Team wallets (vesting)
- Marketing wallet

Excluded wallet addresses will be published and maintained in a public list. Changes to the excluded wallet list require 72-hour timelock.

Note: While designated Treasury, Team, Marketing, and Sponsor wallets are excluded from CYLR rewards, tokens distributed from these wallets to individual holders become eligible for CYLR rewards once held in individual wallets. For complete eligibility terms, please refer to the Private Placement Memorandum (PPM).

5. Holder Benefits

All CYLA holders are treated equally — there are no tiers. Benefits are proportional to holdings.

Core Benefits

- **Community Participation** — Access to the CYLS community, ecosystem updates, events, and community reward programs.
- **Proportional Rewards (CYLR)** — CYLR rewards are distributed proportionally based on the percentage of **eligible CYLA** held during each distribution cycle.
Example: If a holder owns 1% of eligible CYLA, they receive 1% of that cycle's CYLR distribution.
- **CYLT Access Path** — Eligible and KYC-verified participants may redeem CYLR for CYLT, a yield-bearing real-estate-backed token, subject to applicable legal and compliance requirements.
- **Community Signaling** — CYLA holders may participate in non-binding polls and sentiment-based signaling to provide community feedback.

Note: Community signaling is strictly non-binding. CYLA does **not** confer governance or control over protocol parameters. All protocol changes require approval via a **3-of-5 multisig** and are subject to a **72-hour timelock** prior to execution.

CYLA HOLDER BENEFITS

CYLA HOLDER
CA

 CYLR REWARDS Proportional to holdings when Treasury sells CYLA Claim anytime	 COMMUNITY SIGNALING Non-binding polls and sentiment Voice your opinion	 EARLY ACCESS App features Events & announcements Be first to know
 FUTURE UTILITIES Staking programs Campaigns & partnerships Coming soon		
 ALL HOLDERS TREATED EQUALLY — no tiers	 Benefits proportional to holdings	

CYLA is a community token on Solana (SPL). Not a security.

6. Fees & Treasury

Protocol Fees

- **Wallet-to-Wallet Transfers** — **0% protocol fee**. CYLA transfers incur no hidden taxes or transfer charges.
- **CYLR Claim** — **No protocol fee**. Only standard Solana network transaction (gas) fees may apply.
- **CYLR → CYLT Redemption Fee** — **0.25%–0.75%**, applied at the time of redemption. The exact rate may vary within this range and is subject to change based on operational and regulatory considerations.

Note: The CYLA token itself has **no transfer fees**. Protocol fees apply **only** to CYLR → CYLT redemption operations and are enforced at the program layer, not within the CYLA token contract.

Treasury Operations

The Treasury holds **70% of the total CYLA supply**. Treasury sales operate as follows:

- The Treasury sells CYLA for **SOL** on supported exchanges.
- **CYLR is minted at a 1:1 ratio to the net value of SOL proceeds**, calculated at the time of sale.
 - Definition: **Net SOL Proceeds** refer to the SOL received from sales **minus** exchange fees, slippage, and on-chain transaction costs, converted to an equivalent **USDC value** for CYLR minting purposes.
- Minted CYLR becomes **claimable by eligible CYLA holders** following a snapshot of eligible balances.

For full details on eligibility, snapshot mechanics, and distribution logic, refer to **CYLR Tokenomics**.

7. Launch & Liquidity

Guarded Launch

- Phased DEX seeding with small initial depth and reasonable price bands
- Reduces sniping and MEV games during early trading
- Liquidity and band width expand gradually as price discovery stabilizes

Venues

- Primary: Raydium (CYLA/SOL as main pair)
- Secondary: Other Solana DEXs (Jupiter routing, Orca) as volume grows

LP Strategy

- Concentrated liquidity around indicative mid-price
- Secondary pairs (e.g., CYLA/SOL) added once natural two-sided flow exists
- Liquidity allocation supports healthy trading conditions, not price guarantees

8. Governance & Security

Authority Summary

- Mint authority: Renounced at Token Generation Event (TGE) — supply fixed forever at 1B CYLA
- Freeze authority: Renounced at Token Generation Event (TGE) — accounts cannot be frozen

- No emergency actions possible on CYLA token (fully renounced)

Supporting programs (campaigns, fee routing) are governed by 3-of-5 multisig with 72-hour timelock.

Community Signaling

CYLA holders may participate in non-binding polls for community sentiment. Signaling is advisory only — all parameter changes require multisig + timelock approval.

See CYLS Project Whitepaper, Section 7 for complete governance and authority details.

9. Risks

Non-exhaustive list. See CYLS Project Whitepaper and legal documents for full risk disclosure.

- Market risk — CYLA price may move sharply, especially near launch when liquidity is thin
 - Operational risk — Key mismanagement, bugs, or infra outages could impact programs
- Regulatory risk — Token guidance continues to evolve; classification may differ by jurisdiction

- **Wallet Security & Token Loss Risk** — Tokens are cryptographically tied to blockchain wallet addresses controlled by private keys. If a token holder loses access to their wallet (due to lost private keys, compromised credentials, hardware failure, or other causes), the associated tokens cannot be recovered, reissued, or restored by the protocol or any third party. Token holders bear full responsibility for securing their wallet credentials and maintaining adequate backups.

- Perception risk — Users may confuse CYLA with CYLR or CYLT; docs and UI aim to be clear
